

Name	Inputs	Outputs
UpperCase	B5	row = 5, column = B
lowerCase	b5	row = 5, column = B
letterFirst	C2	row = 2, column = C
numberFirst	2C	row = 2, column = C
column number = 0	B0	0 not valid Row
column number = 11	B11	Not valid option
row out of range	Z5	Z not valid column
only letter as coordinate	B	Not valid option
only number as coordinate	5	Not valid option
number as decimal	B5.5	Not valid option
No input	null	Not valid option
input number = 5	5	number = 5
input number = 0	0	Not valid option
input number = 11	11	Not valid option
input number is integer	5.5	Not valid option

Rationale
upper case input works
lowercase column works
column typed first
row typed first
zero not in range
over 9 not in range
column greater than 1 won't work
Only column wont work
Only row wont work
floats won't work
null input will not work
number between 1 and 9 will work
number less than 1 won't work
number greater than 9 won't work
floats won't work
